

MAYNE PHARMA NAMED PITT COUNTY INDUSTRY OF THE YEAR

Greenville, North Carolina: Mayne Pharma has been selected as Pitt County's Industry of the Year for 2015-16. Each year, the Pitt County Development Commission recognizes a manufacturer or distributor that best represents the community as a model corporate citizen.

Mayne Pharma, a publicly held specialty pharmaceutical company headquartered in Australia, established its presence in Pitt County — and the United States — when it acquired Metrics Inc. (Metrics) in 2012. Founded in Greenville in 1994, Metrics started as a laboratory providing analytical chemistry support services to pharmaceutical companies. The company steadily grew into a full-service pharmaceutical development and manufacturing organization that also develops, manufactures and markets branded and generic drug products.

In September 2015, Mayne Pharma announced a \$65-million investment to significantly expand facilities and equipment at its Greenville site. The expansion will include a new, 126,000-square-foot, large-scale oral-dose manufacturing facility, as well as an employee and visitor center, conference rooms, training space, cafeteria, and fitness center. Plans also include repurposing existing space to support the rapid growth in Metrics Contract Services

The investment in U.S. development and manufacturing capacity and capability — as well as a robust pipeline of branded and generic products — positions Mayne Pharma as a global leader in advanced oral drug delivery systems.

The company currently employs more than 350 employees in Greenville, and anticipates hiring another 100 scientists, quality assurance specialists, manufacturing operators and technicians as the expansion progresses.

In addition to the jobs and capital investment Mayne Pharma has announced, the company makes significant community-related investments. The company has a sizeable sponsorship budget for large and small requests for local charitable causes and youth athletic teams. In addition to financial contributions, employees provide thousands of hours of in kind support. Mayne Pharma is also a major corporate partner of Uptown Greenville and a major sponsor of PirateFest.

Mayne Pharma is a key industrial partner for East Carolina University (ECU), providing significant support to the chemistry program, including GMP coursework development. Initiated by Metrics founder Phil Hodges, the relationship with ECU is ongoing and growing. This partnership helps students by teaching skills useful for careers in the pharmaceutical industry, and also provides the company with a valuable pipeline of industry-relevant job candidates.

Mayne Pharma, along with other industry partners, is also a contributor to the development of the Biopharmaceutical Work Force Development and Manufacturing Center of Excellence, a GoldenLeaf-funded collaboration between ECU and Pitt Community College to prepare a qualified pharma workforce for companies in N.C.

News Release

The Pitt County Development Commission is proud to honor Mayne Pharma for their many contributions to Pitt County. The Industry of the Year award will be presented at the annual Existing Industries Reception on February 16, 2016. The reception is sponsored by the Pitt County Development Commission and Greenville Utilities Commission.

About Mayne Pharma in the United States

Mayne Pharma's U.S. operations consist of three main business divisions that focus on contract pharmaceutical services and the development and manufacturing of branded and generic pharmaceutical products. They are:

- *U.S. Generic Products, which develops, manufactures, markets and distributes generic products.*
- *U.S. Specialty Brands, which is responsible for the marketing and distribution of branded pharmaceuticals in the United States.*
- *Metrics Contract Services, which provides contract pharmaceutical development services to third parties globally.*

About Mayne Pharma Group Limited

Mayne Pharma Group Limited is a publicly traded specialty pharmaceutical company listed on the Australian Securities Exchange (ASX: MYX). The company develops and manufactures branded and generic products globally – either directly or through distribution partners – while applying its drug-delivery expertise for contract development and manufacturing services.

Mayne Pharma has a 30-year track record of innovation and success in developing new oral drug delivery systems, and these technologies have been successfully commercialized in numerous products that have been marketed around the world.

Mayne Pharma has drug development and manufacturing facilities in Salisbury, Australia, with expertise in formulating complex oral dose forms, including controlled substances, modified release products and inherently unstable compounds. Visit www.maynepharma.com to learn more.
