

MAYNE PHARMA ANNOUNCES FDA APPROVAL AND IMMEDIATE LAUNCH OF DOXYCYCLINE HYCLATE IR TABLETS, FIRST GENERIC TO ACTICLATE®

15 Jun 2017, Adelaide Australia: Mayne Pharma Group Limited (ASX: MYX) is pleased to announce that the US Food and Drug Administration (FDA) has granted approval of its Abbreviated New Drug Application (ANDA) for doxycycline hyclate immediate release (IR) tablets (75 mg and 150 mg) in the United States. Mayne Pharma has immediately commenced commercial launch to customers in the US.

Doxycycline hyclate IR tablets are a generic version of Acticlate® tablets, a tetracycline-class antibacterial indicated for the treatment of a number of infections, including adjunctive therapy in severe acne. According to IMS Health, annual sales of Acticlate® in the US were approximately US\$250 million for the twelve months ended April 2017.

Mayne Pharma's CEO, Mr Scott Richards, said "We are very pleased to have launched the first generic alternative to Acticlate® in the US, providing more choices to patients and payers in terms of medication affordability. Today's approval exemplifies Mayne Pharma's commitment to bringing first-to-market generic products to the marketplace."

The launch of doxycycline hyclate IR tablets is Mayne Pharma's fourth first-to-market generic launch since June last year after dofetilide capsules, butalbital acetaminophen tablets (50 mg/300 mg) and methylphenidate extended-release capsules (60 mg).

Mayne Pharma markets more than 50 products and has a growing pipeline of more than 40 products targeting US markets with IMS sales greater than US\$7 billion. With 18 drug applications pending at the FDA, Mayne Pharma anticipates additional product launches within the coming year.

About Mayne Pharma

Mayne Pharma is an ASX-listed specialty pharmaceutical company focused on applying its drug delivery expertise to commercialise branded and generic pharmaceuticals. Mayne Pharma also provides contract development and manufacturing services to more than 100 clients worldwide.

Mayne Pharma has a 30-year track record of innovation and success in developing new oral drug delivery systems and these technologies have been successfully commercialised in numerous products that have been marketed around the world.

Mayne Pharma has two product development and manufacturing facilities based in Salisbury, Australia and Greenville, USA with expertise in formulation complex oral dose forms including highly potent compounds, controlled substances, modified release products and inherently unstable compounds.

Acticlate® is a registered trademark of Aqua Pharmaceuticals LLC.

IMPORTANT SAFETY INFORMATION

These highlights do not include all the information needed to use doxycycline hyclate tablets safely and effectively. See full prescribing information for doxycycline hyclate tablets [here](#).

INDICATION AND USAGE

Doxycycline Hyclate 75 mg and 150 mg are tetracycline class drugs indicated for adjunctive therapy for acute intestinal amebiasis and severe acne. To reduce the development of drug-resistant bacteria and maintain the effectiveness of doxycycline hyclate tablets and other antibacterial drugs, doxycycline hyclate tablets should be used only to treat or prevent infections that are proven or strongly suspected to be caused by bacteria.

SELECTED SAFETY INFORMATION ABOUT DOXYCYCLINE HYCLATE TABLETS:

CONTRAINDICATIONS

Doxycycline Hyclate tablets are contraindicated in persons who have shown hypersensitivity to any of the tetracyclines.

WARNINGS AND PRECAUTIONS

Clostridium difficile associated diarrhea (CDAD) has been reported with use of nearly all antibacterial agents, including doxycycline hyclate, and may range in severity from mild diarrhea to fatal colitis. Treatment with antibacterial agents alters the normal flora of the colon leading to overgrowth of C. difficile.

Photosensitivity manifested by an exaggerated sunburn reaction has been observed in some individuals taking tetracyclines. Limit sun exposure. Overgrowth of non-susceptible organisms, including fungi, may occur. If such infections occur, discontinue use and institute appropriate therapy.

To report a SUSPECTED ADVERSE REACTION from one of our products, please contact Mayne Pharma at 1-844-825-8500 or maynepharmamc@dlss.com, or the FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.
